DETAILED ACTION

The amendment filed 2/12/08 has been entered.

Allowable Subject Matter

Claims 30, 32-44, 46-55, and 57 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose a leaf for a multi-leaf collimator, wherein the multi-leaf collimator comprises a plurality of mutually opposite leaves, the leaf comprising a beam-absorbing material of appropriate thickness and disposed substantially only in a region which can enter into the path of the high-energy beam in all possible adjustment positions of the leaf, wherein the leaf comprises an other region which does not absorb the beam, said other region consisting essentially of an other material having a lower atomic number than said beam-absorbing material and also having good mechanical properties, as claimed in claim 30. Claims 32-43 are allowed due to their dependency on claim 30.

Prior art fails to disclose a multi-leaf collimator, the collimator comprising a plurality of mutually opposite leaves, wherein each of said leaves comprises a beam-absorbing material of appropriate thickness only in a region which may enter into a path of the high-energy beam for all possible adjustment positions of the collimator, wherein the leaf comprises an other region which does not absorb the beam, said other region consisting essentially of an other material having a lower atomic number than said beam-absorbing material and also having good mechanical properties, as claimed in claim 44.

Prior art fails to disclose a device for delimiting a high-energy beam, the device comprising a multi-leaf collimator having a plurality of mutually opposite leaves, wherein said leaves each comprise a beam-absorbing material of appropriate thickness only in a region which can enter into the path of the high-energy beam and which is not shielded by said further shielding at all possible adjustment positions of said leaves, wherein each of said leaves comprises an other region which does not absorb the beam, said other region consisting essentially of an other material having a lower atomic number than said beam-absorbing material and also having good mechanical properties, as claimed in claim 46. Claims 47-55 are allowed due to their dependency on claim 46.

Prior art fails to disclose an irradiation device, the device comprising means for delimiting a high-energy beam emitted by an irradiation source, said delimiting means having a multi-leaf collimator comprising a plurality of mutually opposite leaves, wherein each of said leaves comprises a beam-absorbing material of appropriate thickness only in a region which can enter into a path of the high-energy beam and which is not shielded by said further shielding for all possible adjustment positions, wherein each of said leaves comprises an other region which does not absorb the beam, said other region consisting essentially of an other material having a lower atomic number than said beam-absorbing material and also having good mechanical properties, as claimed in claim 57.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
